

2025 COMPANY PROFILE

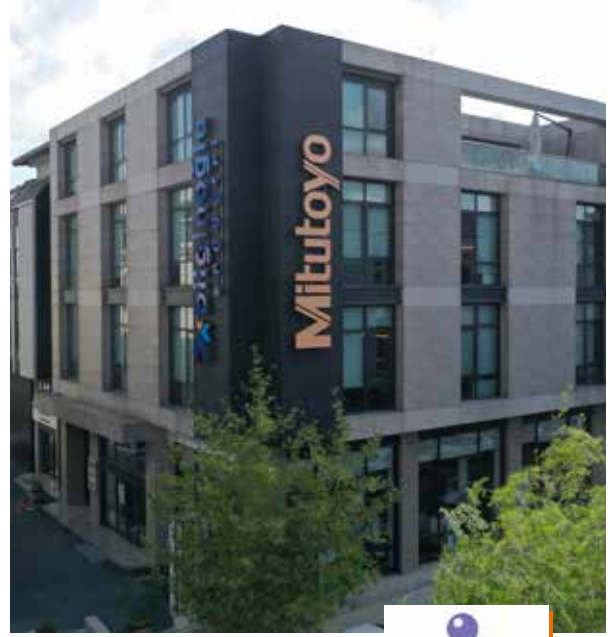

QUALITY CONTROL EQUIPMENT

ABOUT US

Bilginoglu Industry, Over 50 Years of Experience at the Side of Turkish Industry!

As Bilginoglu Endüstri, we have been standing by the Turkish industry since 1973. With the vision of our founder, Mechanical Engineer Ercan Bilginoğlu, we aim to add value to the industry by offering high quality industrial equipment. Thanks to our distributorships and collaborations with globally recognized brands, we continuously expand our service network and offer the latest technologies to Turkish industrialists.

In 1989, we started our cooperation with Mitutoyo GmbH, which led us to become the Main Distributor of Turkey in 2001. Today, we continue to offer solutions to all areas of industry with our offices, showrooms, calibration laboratory and technical services in Izmir, Istanbul, Ankara and Bursa. With more than 50 years of experience, we are determined to serve the needs of Turkey's developing economy in the best way possible.

COMING SOON TO SERVE YOU!

MILESTONES

Quality Control Equipment

Dimensional Measurement

- Small Measuring Instruments and Spc Software
- Ruler Units and Linear Glass Rulers
- High Performance Linear Height Devices
- Sensor Systems, Linear Probes & Laser Micrometers
- Surface Roughness & Form Measurement Systems
- Optical Measurement and Control Systems
- Vision Measuring Systems
- 3D Coordinate Measuring Machines
- Calibration Systems
- Softwares

Material Measurement

- Surface Measurement Systems
- Industrial CT Scanning & X-Ray Solutions
- Hardness Testing Machines
- Material Mechanical Test Systems
- Dynamic Material Testing Systems
- Marking Systems
- Metallography
- Torque Measurement Systems
- Permeability & Barrier Testing
- Stahlwille Aviation Industry Tool Sets

**“There can be no deviation, not even by a μm ,
from the commitment we made”**

“Maintenance without loss of time”

All Mitutoyo devices you purchase from our company are repaired at the most economical prices within or outside the warranty period. Our engineers and technicians in the repair department have received training on this subject by Mitutoyo and have developed themselves to respond to the problems that will come from you. After the repair of the measuring instruments is completed, they are checked with Mitutoyo's gauge and calibration devices and the precision of the device is determined to be within the required tolerances and then delivered. In addition, large devices such as Three-dimensional coordinate measuring devices, Profile Projector, Roundtest, Surf test, Contracer are repaired directly in your factory where they are located and then their accuracy is checked with Mitutoyo's gauge and calibration devices and delivered to you. Your production loss and interruptions are minimized both in the repair processes in our company and in the repair processes in the factory where the device is *located*.

We are at your service with
our TÜRKAK ACCREDITED
CALIBRATION LABORATORY.

The calibration of the 3D CMM, profile projectors, and video measurement devices, which we sell and represent, is carried out by our company in accordance with the relevant standards, in the Calibration Service located within Bilginoğlu Industry Technical Department. Additionally, the calibration of 3D CMM devices for which we perform software and hardware updates, regardless of the brand, is also conducted by our authorized personnel. Our calibration laboratory is accredited by Türkak and has global traceability standards. This ensures that all your calibration processes are carried out with international validity, accuracy, and reliability.

Calibration of Dimensional Measuring Devices

- Parallel Block Gauge
- Surface Roughness Measuring Device
- Surface Roughness Plate
- Plate/Measurement Table
- Electronic Measurement Probe
- Profile Projector
- Measurement Microscope
- Buffer Gauge (Flat/Tapered)
- Ring Gauge (Flat/Tapered)
- Thread Buffer Gauge
- Thread Ring Gauge
- Fork Gauge
- Spline Gauge
- Pin Gauge
- Feeler Gauge Set
- Optical Parallel Glass
- Thickness Foil
- Coating Thickness Measurement Device
- Block Gauge Calibrator
- Comparator Calibrator
- Universal Measuring Devices
- 3D Coordinate Measuring Machines
- Single Axis Linear Measurement Systems
- Caliper
- Micrometers
- Micrometer Setting Rod
- Height Gauge
- Comparators
- Precision Arm Inside/Outside Thickness Measurement Gauges
- Glass Ruler
- Steel Tape Measure
- Tape Measure
- Angle Finder
- Angle Gauge Block
- Squareness Tester
- Water Level
- Slope Meter
- Sine Table
- V-Block
- Radius Gauge
- Thread Pitch Gauge
- Feeler Gauge
- Ultrasonic Thickness Gauge
- Applicator
- Grindometer
- Wet Film Thickness Gauge
- Sphere
- Step Gauge
- Squares
